

ATR DECLARATION FOR SPARES

According to article 33 of regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93-67/EEC, 93/105/EEC and 2000/21/EC.

Article 33 of REACH regulation n°1907/2006 on the Registration, Evaluation, Authorisation and restriction of Chemical provides that "any supplier of an article containing a substance meeting the criteria of article 57 and identified in accordance with article 59(1) in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier; to allow safe use of the article including, as a minimum, the name of that substance."

The first candidate list (28th October 2008) according to article 59 (1, 10) of the REACH regulation has been now published (see the website of the European Chemicals Agency "ECHA" <http://echa.europa.eu/>).

Considering the information available as per today, it is unlikely that any of the substances from the candidate list as published on 28th October and mentioned above would be present in the spares at delivery in a quantity higher than 0.1% weight.

This declaration is provided in good faith on the basis of the candidate list published 28th October and the information collected from the supply chain so far. It will be updated according to the results of further collection of information from the supply chain, which is ongoing.

We would like to assure you that ATR has launched all the necessary processes and actions towards its supply chain.

Finally, should you have any additional question, please do not hesitate to contact ATR at the following mail address: <mailto:environnement@atr.fr>
